CONTENTS OF VOLUME XIV.

NUMBER XL.

Page.

Art. I. Nereis Boreali-Americana; or Contributions to a History of the Marine Algæ of North America; by Wm. Henry Harvey, M,D., &c.—Part I. Melanospermeæ, - - 1

II. On Kirkwood's Analogy; by J. Bradford Cherriman, M.A., 9

III. Notes and Observations on the Analyses and Characters of the Soil of the Scioto Valley, Ohio, with some general considerations respecting the subject of Soil Analyses; by David A. Wells, - - - - - - - - - 11

IV. On the Chemical Principles involved in the Manufactures of the Great Exhibition; by Lyon Playfair, C.B., F.R.S., - 19

V. Abstract of a Memoir on Polymerous Isomorphism, by Th. Scheerer, - - - - - - - - - - - 37

VI. Remarks on Menodora, *Humb. & Bonpl.*, and Bolivaria, *Cham. & Schlecht.*; by Asa Gray, - - - - - 41

VII. Chemical Examination of a few Minerals associated with Serpentine; by T. H. Garrett, - - - - - - 45

VIII. On Remingtonite, a new Cobalt Mineral; by James C. Booth, - - - - - - - - - - - 48

IX. Post-Pliocene of the Southern States and its relation to the Laurentian of the North and the Deposits of the Valley of the Mississippi; by E. Desor, - - - - - - - 49

X. Mineralogical Notices; by Prof. Meneghini of Pisa, - - 60

XI. Notice of A. Quekett's Practical Treatise on the use of the Microscope, - - - - - - - - - - 65

XII. On the Resinous Nature of Coal, - - - - - - 70

XIII. Description of a Slide on Mount Lafayette, at Franconia, New Hampshire; by President Edward Hitchcock, - 73

XIV. On Coral Reefs and Islands.—With a Map.—By James D. Dana, - - - - - - - - - - - 76

XV. Remarks on the proposed Geographical Survey of New York, 84

XVI. On the Electrical Properties of Flame; by Prof. H. Buff, 88

XVII. Comparison of the modifications of the Osseous structure of the Megatherium with that in other known existing and extinct species of the class Mammalia; by Prof. Owen, - 91

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Transmission of Radiant Heat through Crystals, 97.—Mean density of the Earth: Preparation of pure Methylic Alcohol, 98.—Formation of Sulphuric Acid from Sulphurous Acid and Oxygen: Constitution of Tannic Acid, 99.—Products of the decomposition of Hippuric Acid: New Alcaloid derived from Piperine, 100.—Chemical properties of Electrified Bodies, 101.—New organic Acid: Donarium identical with Thorium, 102.

Mineralogy and Geology.—Mines of Sulphurets of Arsenic and Sulphur in Koordistan, 103.—Mineralogical Notices, by W. T. Blake: Eruption from the summit of Mauna Loa, Hawaii, 105.—On the Structure of the Iguanodon, and on the Fauna and Flora of the Wealden Formation, 107.—Note on the Fluor-spar locality of Gallatin Co., Ill., by G. J. Brush, 112.

Botany and Zoology.—The Camphor-Tree of Sumatra, 113.—The Chinese Rice-Paper Plant: Fungi Caroliniani Exsiccati: Antonio Bertoloni; Miscellanea Botanica, 114.—Outlines of the Natural History of Europe, by Arthur Henfrey, F.L.S., 115.—Conspectus of the Crustacea of the Exploring Expedition under Capt. C. Wilkes, U. S. N.; by James D. Dana, 116.—A Monograph of the Sub-class Cirripedia, with Figures of all the Species, by Charles Darwin, F.R.S., F.G.S., 125.—Dr. A. Binney's Terrestrial Air-breathing Molluscs, 127.—Note on Graptolites, by Dr. H. B. Geinitz, 128.

Astronomy.—Sixteenth Asteroidal Planet—Psyche, 129.—Seventeenth Asteroidal Planet—Thetis: First Comet of 1852: Observations on an Auroral Beam, April 22, 1852, 130.—Auroral Bow of June 11, 1852, 131.

Miscellaneous Intelligence.—Remarks on the Climate of San Francisco, by Dr. H. Gibbons, 131.—Remarks on the Winter of 1851-2 in Canada, &c.; by Capt. J. H. Lefroy, R.A., F.R.S., 135.—Region of Lake Superior: A New Fuel, 138.—Abstract of Meterological Observations made at Attleboro', Mass., by Henry Rice, 139.—Nees von Esenbeck, 140.—Prices of Microscopes made to order, by I. & W. Grunow, 145.—American Association for the Advancement of Science: Gold of California, 146.

Bibliography.—Steam-Boiler Explosions, 146.—Records of the School of Mines and of Science applied to the Arts: Annual of Scientific Discovery, A Year Book of Facts in Science and Art, for 1852; edited by David A. Wells, A.M., 148.—A Handbook of Organic Chemistry, by William Gregory, M.D., F.R.S.: Appleton's Mechanics' Magazine, and Engineer's Journal; edited by Julius W. Adams, Civ. Eng.: The Naval Dry Docks of the U. States, by Chas. B. Stuart, 149.—Graham's Elements of Chemistry: The Assay of Gold and Silver Wares, by Arthur Ryland: Lectures on the Results of the Great Exhibition delivered before the Society of Arts: Course of the History of Modern Philosophy, by M. Victor Cousin, translated by O. W. Wight: W. H. Buren, M.D., and E. E. Isaacs, Illustrated Manual of Operative Surgery and Surgical Anatomy, 150.—Lectures on Histology, delivered at the Royal College of Surgeons of England, in the Sessions of 1850, 1851, by John Quekett, 151.

List of Works, 151.

NUMBER XLI.

Page.

Art. XVIII. Second Report on Observations of the Aurora Borealis, 1850–1851; by J. H. Lefroy, - - - - - 153

XIX. On the Arts and Manufactures of India; from a Lecture by Prof. Royle, - - - - - - - - - - - 160

XX. Abstract of a Paper on the Humite of Monte Somma; by Arcangelo Scacchi, of Naples, with observations, by James D. Dana, - - - - - - - - - - 175

XXI. Further Remarks on Ventilation and the Warming of Rooms; by S. Webber, M.D., - - - - - - - 182

XXII. Notes on the Use of the Zenith Telescope in Determining Latitudes in the Coast Survey, by Talcott's Method, and on the Reduction of the Observations; by A. D. Bache, - 191

XXIII. Contributions to Analytical Chemistry; by Wolcott Gibbs, M.D., - - - - - - - - - - 204

XXIV. On Certain Analogies in the Solar System; by Professor Daniel Kirkwood, - - - - - - - - - 210

XXV. On the Eruption of Mauna Loa, Hawaii, February, 1852; by Rev. Titus Coan, - - - - - - - - - 219

XXVI. On the Rocks of Canada; by Messrs. W. E. Logan, and J. W. Salter, - - - - - - - - - - 224

XXVII. The Inverted Microscope—a new form of Microscope; with the Description of a New Eye-piece Micrometer, and a New form of Goniometer for Measuring the Angles of Crystals under the Microscope; by Prof. J. Lawrence Smith, M.D., - - - - - - - - - - 233

XXVIII. Abstract of a Meteorological Journal, kept at Beloit College, Beloit, Wis., for the year 1851; by Prof. S. P. Lathrop, M.D., - - - - - - - - - - 241

XXIX. Solidification of the Rocks of the Florida Reefs, and the Sources of Lime in the Growth of Corals; by Prof. Horsford, 245

XXX. Note on the Eruption of Mauna Loa; by James D. Dana, 254

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—Determination of Arsenic in Organic Substances, 259.—Identity of Donarium with Thorium: Conversion of Sulphates into Chlorids: Anhydrous Organic Acids, 260.—Equivalents of Sulphur and Barium: On the Corrosion of Lead by Galvanic action, by R. Buckler, 261.—Crystallization of Glass: Analyses of Snow and Rain water, by Eugene Marchand: Titanium and Zirconia in Mineral Waters, 263.

Mineralogy and Geology.—Mineralogical Notices, No. IV, 264.—Large Deposit of Graphite: Flora of the Tertiary Formation, 280.—On the Causes which may have produced changes in the Earth's Superficial Temperature, by W. Hopkins, Esq., 282.

Astronomy.—New Planet, 283.

Miscellaneous Intelligence.—Remarks on the Climate of San Francisco—the Sea-Breeze, by Dr. H. Gibbons, 283.—Heat of the Solar Disk, 286.—On Rain Waters: Pendulum Experiment, 287.—Microscopic Photographs: On a Lunar Rainbow, 288.—Meteorological Observations taken by the Royal Astronomer at the Observatory of Athens (Greece): Aurora Borealis: Freedom of the Arabs from Leprosy: Prizes of the Academy of Sciences of Paris, 289.—M. Oberhauser: Dr. Mantell: Mitscherlich, 290.—*Obituary.*—M. Wilhelm Hisinger: Dr. Nilo Wulfsberg: Dr. James B. Rogers, 290.

Bibliography.—On the Osteology of the head of Hippopotamus and a description of the Osteological Characters of a new genus of Hippopotamidæ, by Dr. J. Leidy, 290.—Exploration and Survey of the Valley of the Great Salt Lake of Utah, by Capt. Howard Stansbury: DeCandolle's Prodromus Syst. Nat. Regni Vegetabilis: A detailed description of the British Palæozoic Fossils in the Geological Museum of the University of Cambridge, by Prof. Fred. McCoy, 291.—Annales de L'Observatoire Physique Central de Russie, by A. T. Kupffer: Compte-Rendu Annuel Addressé à M. Le Comte Wrontchenko, par A. T. Kupffer: Journal de Conchyliologie comprenant l'etude des Animaux, des Coquilles Vivantes et des Coquilles Fossiles: Considerazioni sulla Geologia della Toscana dei Professori Cav. Paolo Savi e G. Meneghini, 292.—Uber die Larven und die Metamorphose des Echinodermen, by Joh. H. Muller: Nineteenth Annual Report of the Royal Cornwall Polytechnic Society: Fifth Annual Report of the Regents of the University of New York, on the Condition of the State Cabinet of Natural History, &c.: Sixty-fifth Annual Report of the Regents of the University of the State of New York: Transactions of the American Philosophical Society of Philadelphia, 293.—Annals of the Lyceum of Natural History of New York, 294.

List of Works, 294.

APPENDIX.

On the Classification of the Crustacea Choristopoda or Tetradecapoda; by James D. Dana, 297.

NUMBER XLII.

Page.

Art. XXXI. Davis's Report on the Nautical Almanac, - - 317

XXXII. Notes on the Cereus giganteus of South Eastern California, and some other Californian Cactaceæ; by Dr. George Engelmann, - - - - - - - - - - 335

XXXIII. Examination of some American Minerals; by T. S. Hunt, - - - - - - - - - - - - 340

Page.

XXXIV. Additional Notes of a Discussion of Tidal Observations made in connection with the Coast Survey at Cat Island, Louisiana; by Prof. A. D. Bache, - - - - - - 346

XXXV. Review of Researches on the Physical Geography of the Alps, in relation to the phenomena of Glaciers, to Geology, Meteorology, and the Geography of Plants; by Hermann Schlagintweit and Adolph Schlagintweit, - - 359

XXXVI. On the Reproduction and supposed Existence of Sexual Organs in the Higher Cryptogamous Plants; by Arthur Henfrey, F.L.S., - - - - - - - - - - 378

XXXVII. Facts and Principles Relating to the Origin and the Geographical Distribution of Mollusca; by Thomas Bland, F.G.S., London, - - - - - - - - - - - 389

XXXVIII. On the Satellites of Uranus; by Prof. Elias Loomis, 405

XXXIX. On some modern Calcareous Rock-formations; by James D. Dana, - - - - - - - - - - 410

XL. Analysis of Fowlerite; by W. Camac, M.D., - - - 418

SCIENTIFIC INTELLIGENCE.

Chemistry and Physics.—On the motion of Fluids from the Positive to the Negative Pole of the closed Galvanic Circuit, 420.—Mechanical Equivalent of Heat: New Organic Radical containing Tin: Preparation of Magnesium, 421.—Adulteration of Beer with Strychnine, 422.

Mineralogy and Geology.—On Diopside and Molybdate of Lead, furnace products, by J. Fr. L. Hausmann: Formation of Arragonite and other minerals, 423.—On the artificial formation of Malachite, by M. H. Rose: On the supposed Dimorphism of Zinc: The Quader-formation of Germany, 424.—New Zealand: On the Tertiary Strata of Belgium and French Flanders, by Sir C. Lyell, 425.

Botany and Zoology—The Botany of the Antarctic Voyage; II. Flora of New Zealand, by Joseph Dalton Hooker, M.D., F.R.S., 427.—The Botany of the Voyage of H. M. S. Herald, during the years 1845–51, by Berthold Seemann: On the Microscopic Life of the Sediment of the Mississippi, by M. Ehrenberg, 428.

Astronomy.—New Planet: The Planet Melpomene: Second Comet of 1852: Comet: Shooting Stars of August 9–10, 1852, 430.

Miscellaneous Intelligence.—British Association, Address of the President, Col. Sabine, 431.—On a mass of Meteoric Iron from near Seneca River, N. Y., by Prof. O. Root, 439.—The "King of the Nuggets," the largest specimen of pure Gold found in Australia: On the Influence of Suggestion in modifying and directing Muscular Movement, independently of Volition, by Dr. W. B. Carpenter, 440.—Motion in the Bunker Hill Monument through the action of the Sun's heat, 443.—Spots on the Sun, 444.—On the Freezing of Vegetables,

445.—Medals of Creation: On the Cereus Greggii, by Dr. ENGELMANN, 446. —On the Oscillations of Suspension Bridges, by J. H. RÖHRS, Esq., A.M.: Siberian Exploring Expedition: Rain in the Khassya Hills, 447.—*Obituary.*—John Pitkin Norton, 448.—Charles Athanasius Baron de Walckenaer, 449.

Bibliography.—Address at the Anniversary Meeting of the Royal Geographical Society, May 24, 1852, by Sir R. I. MURCHISON, 450.—On a Fossil Saurian of the New Red Sandstone Formation of Pennsylvania, and on New Fossil Molluscs in the Carboniferous Slates of the Wilkesbarre Coal Formation, by ISAAC LEA: On the Fossil Footmarks of Red Sandstone of Pottsville, by ISAAC LEA, 451.—Catalogue of Shells collected at Panama, with Notes on their Synonymy, Station and Geographical Distribution, by C. B. ADAMS: Proceedings of the American Association for the Advancement of Science, Albany meeting, August, 1851: Elements of Natural Philosophy, by Prof. W. H. C. BARTLETT, LL.D., 452.—A Descriptive Treatise upon the Sun, Moon and Planets, including the Solar System, by J. RUSSEL HIND: A Treatise of Analytical Geometry, proposed by Rev. BENEDICT SESTINI, S.J.: An Essay on Organic or Life Force, by J. H. WATTERS, A.B.: Address delivered at the Anniversary Meeting of the Geological Society of London, Feb. 20, 1852, by WM. HOPKINS, Esq., 453.—The Mastodon Giganteus of North America, by JOHN I. WARREN, M.D., 454.—A Treatise on Mineralogy, by CHARLES U. SHEPARD, M.D.: Observations on the Genus Unio, with Descriptions of New Species in the families Unionidæ, Colimacea, and Melaniana, by ISAAC LEA: A Synopsis of the Family Naiades, by ISAAC LEA, 455.

List of Works, 455.

Index, 456.

ERRATA.

P. 302, 15th line from top, for 6-*articulatum*, read 1-6-*articulatum*.
P. 305, last line, for 92, read 192.
P. 306, 5 lines from bottom, for iii, read viii.
P. 307, 14th line from top, after *thoracis* insert *feminæ*.
P. 308, 25th line from bottom, for *sex*, read 1*mi* 2*dique*.
P. 315, 9th line from top, for *nudo*, read *nullo*.
